

Spring Planting Calendar for Ridgefield Park

From the Almanac's [Spring and Fall Planting Calendars](#)

Updated: December 2023

When we say "fall," we really mean planting in summer in time for a fall harvest. Think of this as a second summer! It's easy to keep the crops going if you're already prepared the soil!

Many crops that would be started indoors for a spring crop can just be plunked into the soil directly for a fall crop. Not only is the soil already warm but also there are less pests and it tends to be rainier so you don't need to water as often. Some fall vegetables need to be harvested by the first frost but also many are frost-tolerant—and even taste better after a kiss of fall frost!

See each plant's individual Growing Guide for more specific planting, plant care, and harvesting information.

SPRING Planting Dates

On average, last Frost Date is April 7

Based on Frost Dates

Based on Moon Dates

Crop	Start Seeds Indoors	Plant Seedlings or Transplants	Start Seeds Outdoors	Last Date to Plant
