

Squad members evaluate the scene

View of trapped vehicle (from underside of trailer box)

Rescue Technician enters the vehicle and reassures the patient

The images depicted here were taken on April 9th of this year (2005). These photos show one example of the kind of situation Heavy Rescue Technicians must deal with when called to extricate a person trapped in a wrecked automobile. A description of the procedures used to save the patient in this incident can be found in "The 530 News" which appears in another link on this Web site.

All of the first responders from Ridgefield Park (Rescue, Fire and Ambulance) joined together in a well coordinated effort which resulted in the timely rescue of this motorist.

Rescue Technician using Hurst equipment to cut the roof

With the roof cut away, the patient will be removed from the vehicle

Helicopter landing on Route 95 to evacuate the patient

Volunteer your time and talent to one of the Ridgefield Park Emergency Services.

The Heavy Rescue Squad, The Fire Department and the Ambulance Corps will be holding a membership drive at the Ridgefield Park High School on September 30th between 9:00 a.m. and 1:00 p.m.
